

# NAJM ADAMS LAMBON

## SUMMARY

Results-driven Lead Engineer with a strong track record at Sophon, where I led the development and successful launch of the Sophon POS system, streamlining customer and inventory management. Skilled in software development, process optimization, and innovation management, I excel at building scalable solutions and working with team members to drive efficiency. Passionate about enhancing user experience through cutting-edge technology, and strategic problem-solving.

## EXPERIENCE

### Software Engineering Intern, 01/2024 - 02/2025

#### Links Engineering - Accra, Ghana

- Evaluated user feedback to pinpoint areas for software enhancements, leading to improved functionality and user experience.
- Managed source code changes efficiently using version control systems like Git and GitHub throughout development cycles.
- Developed and tested Python scripts to automate repetitive tasks, improving efficiency and reducing manual effort.

### Lead Engineer, 01/2023 - 02/2024

#### Sophon - Accra, Ghana

- Designed and launched Sophon POS, a powerful point-of-sale system optimized for accurate customer and inventory management.
- Identified and resolved customer issues by implementing effective debugging strategies, and developing targeted defect fixes.
- Led software system installations and collaborated with the UX team to design and implement new features, enhancing usability and functionality.
- Improved program performance by analyzing code, optimizing processes, and implementing necessary enhancements.

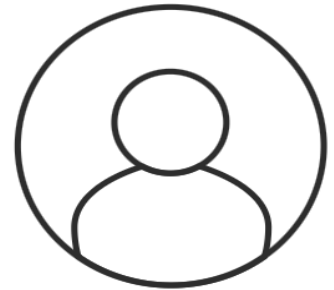

## CERTIFICATIONS

- **Meta Certified React Native Developer** – Meta (2023)
- **JavaScript Algorithms and Data Structures Certification** – freeCodeCamp (2023)
- **Data Analysis with Python** – Coursera (2023)
- **Machine Learning Basics with Python** – Coursera (2023)

## EDUCATION AND TRAINING

Bachelor of Science, Computer Science, Expected in 12/2025

Kwame Nkrumah University of Science And Technology - Kumasi, Ghana

## CONTACT

**Address:** Accra Ghana

**Phone:** 0555547984

**Email:**

najmadams1702@gmail.com

## SKILLS

- System design
- Software development
- Scalability planning
- Innovation management
- Hardware and software installation
- Test automation

## ACTIVITIES AND HONORS

- **Freelance Developer** – Built and optimized web and mobile applications for clients.
- **Mentor & Tutor** – Assisted beginners in JavaScript, React Native, and Python through online communities.
- **Personal Projects** – Developed and maintained various software applications, including Sophon POS and possibly Skejula.
